THE NEWS OF THE DAY.

CONDENSED FOR BUSY PEOPLE.

Short and Interesting Paragraphs that Treat of Men and Things in a General Way.

Caterpillars are devouring the grain fields near Belleville.

A young man named Albert Fisher, was drowned while bathing at Brantford he was taken with cramps.

The roof of the Presbyterian church in course of erection at Palmerston, Ont., fell the other day, killing John Whittily and injuring several workmen.

Archibald Hamilton was drowned in the South Nation river, below Ottawa. He was tipped out of the buggy while crossing the river with some companions.

Thieves broke into the vestry of St. George's cathedral, Kingston, and after drinking all the wine in sight, ransacked the box containing the archbishop's vestments.

Louis Roche, a Montreal hay dealer has failed. Liabilities placed at \$70,000. Cause of failure attributed to heavy losses in shipping to England.

The grasshopper plague has struck the Kingston, Ont., district, and already much damage has been done to crops. The township of Camden in particular, has suffered greatly.

The basket factory operated by Milton P. Pratt, Toronto, was recently destroyed by fire, together with the stone church adjoining. The loss is estimated at \$5,000. Parties insured.

Henry Starnes, son of the late Hon. Mr. Starnes, died suddenly the other night at his residence in Montreal, aged 41. Deceased was formerly a teller in the Montreal Bank in that city, and was very popular.

F. C. Caswell, of Stanstead, Quebec, dropped dead of heart disease recently. Her husband's sudden taking of unbidden. Mr. Caswell's mind and the other night she hanged herself in the room where her husband had died.

Work comes from the Ashford settlement of Bagot, Ont., of the finding of the body of Michael Doyle in the river. The corpse was devoid of clothing, all but the boots. Doyle was of a weak mind, and it appears he wandered away.

Thomas H. P. Carpenter, of Winona, Ont., suffering from a mild attack of smallpox. The authorities have isolated him, and have taken every precaution to prevent the disease spreading. It is thought Carpenter contracted it during a recent visit to Detroit.

His Lordship Bishop Dart, of the diocese of New Westminster, B. C., has appointed Rev. R. Small, M. A., archdeacon of the diocese. Mr. Small has been missionary at Lytton for some years, and was at one time missionary at New Westminster from 1870 to 1877. He received his degree of B. A. in 1870 and was presented by Lord Bishop Ripon in 1871.

Whitely has had an earthquake. The shock was felt and heard by shuddering thousands who are increasing in number as rapidly as the news that there was an earthquake, reaches them. It occurred, according to those who were awake, and are, therefore, in a position to be explicit, at five minutes to one in the morning and lasted twenty seconds. No body was injured and no trace was left at daylight.

Mrs. Alexander Cameron, probably the wealthiest lady in Canada, was married recently at her home in Toronto to Capt. John Morrow, of Montreal. The ceremony was performed by Bishop Donnelly. The wedding was private only a few intimate friends of the couple being present. This is Mrs. Cameron's third marriage. Her first husband was Edward Ward, a ship owner, of Detroit. A daughter of Mrs. Cameron, by Ward, is Princess de Chemany, having married a Belgian nobleman.

Alex. McKenzie, an old bachelor, living at Leroy, near Barrie, Ont., was missed in the neighborhood, and a foul smell emanated from the place where he lived. The neighbors found the old man lying dead in a filthy and decomposed condition. He had lived around there for about forty years and was supposed to be penniless. In looking through his traps \$500 in gold coin was found; also several bills of the Bank of Upper Canada, that bank being now long extinct. He also had three watches, besides many kinds of musical instruments.

Suicide on a Warship. The Halifax Deputy Chief of Police Nicholson has gone to New York for the purpose of bringing back to Halifax Ernest Leathen, a former assistant to the paymaster of the British warship Buzzard, who is wanted by the authorities on the charges of forgery, larceny and desertion. The man disappeared while the Buzzard was at Jamaica last March, and it was afterwards discovered that the money which the sailors in the ship had entrusted him to send to relatives in England had not been forwarded and that certain papers had been forged in order that he could carry on the swindle. It is said the amount of money collected in this way was considerable. A short time ago a letter was received on the ship addressed to a former chum of Leathen. The chum had also departed, and the writing being recognized the letter was opened and it was the address of the missing paymaster's assistant. He was working in New York, in the employ of a dairy company. Measures to secure him were taken with success, and he has consented to return without extradition proceedings.

Died While Cycling. Mrs. Anna Hodgins, wife of a well-known Toronto barrister, while riding a bicycle in Battersea park, London, England, fainted and fell from her wheel. John Burns, the labor leader, and member of parliament for Battersea and Crippin, lifted Mrs. Hodgins from the ground and carried her to the park lodge, where she died in a few minutes. The coroner's jury rendered a verdict "that the cause of death was apoplexy."

GREAT CATASTROPHE NEAR OMAHA.

Twenty-Eight People Killed and a Number Wounded by the Collision.

Omaha, Neb., is a city of morning. The bright Sabbath morning brought with it a full realization of the greatest catastrophe that ever wreaked death and desolation in the hearts and fires of the city's people. Twenty-eight persons were killed and a large number injured fatally, in the railway wreck at Logan, Iowa. Twenty-four of the dead are identified and the others are so badly mutilated that identification is hardly possible. It was not until the morning papers were out that the first authentic information became generally known. The depot was the centre towards which they all turned and when the morning trains brought in their burden of dead, and drying the depot approaches were thickly lined with people.

The list of injured is a lengthy one. It contains the names of twenty-eight or more persons who are seriously injured, and are in a greater or less degree. In addition there were at least fifty, if not a greater number who received injuries of a minor nature. The roll of dead belonging in Omaha numbers at least eight and the list is as follows: John McDermott, John Kinsey, Robt. Clark, John H. Jack, John Larsen, Fred N. Eisen, John B. Kilker, Owen Kavanagh, Hugh Dodson, Mrs. Kate Bradley and baby, Mrs. P. J. Carroll and baby, Patrick Smith, Miss Mary Tracy, John Cosgrove, aged 10; Wm. Cosgrove, aged 14; Margaret Cosgrove, 24. In addition to these the following residents of other towns were killed: Mrs. East, Mrs. Peck, and the other twenty-nine. The list so far as has been obtained is as follows: Chas. Helman, Missouri Valley; Walter Jennings, Missouri Valley; Geo. Winkler, Missouri; Mrs. L. W. Peck, Grand Rapids; Mrs. Miss O'Leary, Council Bluffs; Mrs. Taylor and baby, Council Bluffs.

The responsibility for the accident rests on Engineer Montgomery, of the ill-fated excursion train. His orders were to wait at Logan for the fast mail and fast freight. He started his train out immediately after the mail passed, forgetting about the freight. The heavy freight passed partially over the passenger train, and the people killed were in the front coach of the excursion.

Three Men Run Amok. Three men in a buggy, drawn by a gray horse, created a reign of terror on the north side of Chicago the other morning. They drove rapidly through the streets, emptying their revolvers in the air and now and then made things lively by firing at people whom they passed. During their ride they shot three men, one of them fatally. The men are: George Wm. Sauer, of the Chicago Avenue police station; twice in the breast and once in the neck; will die; Andrew Martin, shot in right heel, not serious; John Keefe, shot in left instep, not serious.

Martin and Keefe were walking on Wesson street together, and when they heard men shouting they stopped and saw a horse and buggy coming down the street. It was a light gray buggy and the horse was a white one. The driver was a man in a suit and a top hat. Every few seconds there would be a flash and the report of a revolver would be heard. When the men were opposite Martin and Keefe they began shooting at them. One bullet tore away a part of Martin's head and another shot into Keefe's left instep. Both fell to the sidewalk, but the men in the buggy did not stop. They fired several more shots none of which took effect, and continued to drive on. When they were opposite the police station the driver stopped. The police started after the men, but could not find them until after midnight, when Sergt. Sauer saw three men in a buggy drawn by a gray horse enter an alley. He followed them and as soon as he appeared at the entrance to the alley the men fired at him. Not a word was uttered by the men or by the officer. All the bullets struck Sauer and he cannot move and there is no clue to their identity.

TWENTY KNOTS AN HOUR.

The British Cruiser Terrible Shows Remarkable Speed.

The enormous man-of-war, Terrible, recently built on the Clyde for the British navy, maintained a speed of 21 knots an hour on her recent maiden trip from Glasgow to Portsmouth, and it is asserted that she can maintain a speed of 25 knots, which is remarkable in view of her size and length—18,200 tons, and 500 feet respectively. Not less remarkable is the Terrible's carrying capacity, enabling her to carry 2,000 tons without requiring her sister ship, the Powerful, to be in commission, and then the British admiralty may claim to hold the world's record in this class of vessels. The naval expert is not satisfied, however. They are still crying aloud for more men, more quick-firing guns and such like things, which, of course, mean more money. The leader of the malcontents, Capt. Lord Charles Beresford, loses no opportunity of warning Englishmen that they are living in a fool's paradise, and being deceived by the very people who ought to tell them the whole truth. This distinguished critic pledges his readiness as a man that if it was declared to-morrow, a score of powerful warships would have to remain in port for lack of sailors and stokers to man them, and this for the sole reason that the government of the day, Conservative and Liberal alike, fear to face the necessary expenditure.

A SAD ACCIDENT.

A Young Girl Crushed to Death While Sleeping.

Crushed to death beneath the wheels of a train while asleep on the track, such was the terrible fate that met a fair young girl, and her companion, who was also asleep, severely injured. News was received recently of a peculiar and tragically accident which occurred the other afternoon on the Cavalier branch of the Great Northern railway, some two miles from Canton and about six miles from Cavalier, S. D. An extra train, a freight loaded with wheat, and in charge of Conductor Wright, left Cavalier about noon south bound. When under full speed and in passing a curve Engineer Wright's keen eye discovered some object on the track some ten or twelve rods distant. He

could not at first determine just what the obstruction was, but he blew the whistle and quickly reversed the lever. A second look, however, showed him that two women or girls were lying across the track. Repeatedly he signalled with the whistle, but they gave no heed. They were sound asleep. It was too late to stop the heavy train, and both were run over or thrown from the track. They were May Armstrong and Mary Bettschell, aged 16 and 17 years respectively. The Bettschell was instantly killed, and Mrs. Armstrong, frightfully bruised and torn. It appears that the girls started out from Cavalier early in the day to pick strawberries. Not meeting with great success, they evidently walked on until they were completely exhausted, and probably sitting down on the track to rest, sleep must have overcome them. The injured girl was conscious when found, but was unable to tell how they happened to be on the track. The terrible accident casts a gloom over the people of Cavalier, where they lived, and where both have been highly esteemed. It may be stated that the regular trains on this line do not run on weekdays, and the girls may have felt perfectly secure from any danger from that source.

COAL IN ALGOMA.

Prof. Mickle's Discoveries in the Sudbury District.

A short time ago Prof. Mickle, of the school of science in Toronto, was north on a tour to Algoma district. His journey was not purely one of pleasure—in fact it was a business trip, as he was sent out there by a syndicate to investigate rumors that there was coal in the Algoma district. He says a Toronto paper has been discovered which will materially affect not only the district in which it is located, but also the whole country. His labors are now nearly at an end, and as a result an extensive coal deposit has been discovered which will materially affect not only the district in which it is located, but also the whole country. His labors are now nearly at an end, and as a result an extensive coal deposit has been discovered which will materially affect not only the district in which it is located, but also the whole country.

The syndicate for which Professor Mickle has been conducting his investigations is composed of well known figures residing in Toronto, Ottawa and Sudbury. A Buffalo man is also in the combine with the Canadians, and as may be supposed, they are well pleased with the result of the professor's research.

The discovery is regarded by those who know about it as being one of the most important of many years. For a long time the practical men of the district have been looking for a source of coal in the Sudbury district has been a source of regret to those interested in Canada's welfare as a manufacturing country. A road has now been opened, through the good work of Professor Mickle and his associates, and that it will be taken immediate advantage of goes without saying.

A MONKEY SUICIDES.

Franko, Glen Island's educated monkey suicided the other day. The monkey, it is claimed, deliberately hanged himself, and back of the sad affair is a story of unrequited love.

In the same cage with Franko was a female monkey to whom he paid marked attention. If a visitor threw a peanut into the cage and any other monkey got there a fight would be the result, and in the end Franko bore the brunt of it, and pressed it to his chest. He would hang by his tail and chatter to her for hours and perform more funny tricks for her special benefit than all of the rest of the monkeys combined.

Two days ago Franko was transferred to another cage and at once became a changed monkey. He moaned in a corner and showed unmistakable signs of his displeasure. Keeper Walter Bannister, who made monkey the study of his life, divined the cause of the little fellow's displeasure and ordered him returned to his old quarters. The change was to have been made the next day. Had Franko known it, the sad tragedy would probably have been averted.

When one of the attendants made his rounds shortly after daybreak he discovered Franko hanging by the neck from a rope over one of the bars of his cage. He was out of his home too far to be revived, as the sunrise glow was far from the military headquarters at Willet's Point, across the Sound, he opened his eyes a moment, then died in the keeper's arms.

Cold Storage for Vegetables.

One of the most remarkable new departures in the freight business is the idea of using vegetables for shipping long distances. It has been tried spasmodically in other years, but never until this year was the plan carried out to any extent. Now the New Orleans shippers are using their vegetable cars right along. They already in season loaded 25 cars to New York city alone that contained leaf vegetables, and the shipments to Buffalo, Boston, Pittsburg, Baltimore, Philadelphia, and in fact all the northern cities, have followed on this new idea. The shipment of cucumbers, cabbages, beans and all kinds of garden stuff have been grown very rapidly in the past few years, and now the producers have found it necessary to store them. The process of packing is quite interesting.

A Fatal Runaway.

A little boy named Belzart, while playing with his two sisters, 4 and 5 years old, and a little daughter of Fred Danand, near Marshall, Minn., he playfully tied the three girls together with a rope, which he attached to the saddle of a pony. The children, frightened the pony, which ran away dragging the girls half a mile before it was stopped. The Danand girl and one of the Belzart girls were killed. The other girl was terribly injured, but will probably recover.

A KING IN EARNST NOW.

Menier, the Frenchman of Chocolate Fame, Has Made Many Sales.

M. Menier, the French millionaire who purchased the island of Anticosti states in the most positive terms that he had not only never pretended to have authority in the matter of the three-mile limit, forbidding all fishermen to fish within that area, but he had not even thought of doing so. He admitted that he had refused to give certain rough characters, who are fishermen, permission to land on his island, but justified his act by declaring that, as sole owner of the property, he had the right under law to do so.

M. Menier, to support his position, quotes the laws and regulations he has established as a private citizen for the management of his property, as follows: The island of Anticosti is private property, a dependence of the province of Quebec, and governed by the laws of Canada and the province. The inhabitants of this island, who can only reside there by regular permission, must agree to submit to the regulations for the government of the island and all other rules and administration which are heretofore set forth.

The rules then follow. In brief, they provide that no one can live, conduct business or any industry or profession upon the island, except by the consent of the administration of the island, such permission being at all times revocable. There can be no importations or exportations except through the regular channels of the administration and it is prohibited to import or export any goods or merchandise, except by permission, is prohibited.

The hunting and killing of game is not permitted, nor is fishing in the rivers, estuaries or lakes of the island. The possession of navigating craft is only permitted by authority. All births, marriages and deaths taking place on the island must be reported to the administration, that the statistics may be properly recorded. The discovery of minerals must be at once reported to the administration.

All interments must be in places specified for that purpose. The appearance of contagious diseases must be at once reported to the administration, and all persons arriving on the island must be vaccinated. The privilege of carrying arms is not allowed. This regulation will give the inhabitants their complete rights, and will at the same time be a source of profit to them.

For the purpose of preventing forest fires and the needless destruction of timber the burning of trees, etc. is forbidden. The heads of families are responsible for the public delinquencies of their children, minor relatives and employees. All infractions of these regulations will be considered grounds for the revocation of permission to remain on the island.

Continuing, M. Menier said: "I purchased the island with every intention of respecting the laws of Canada in all details. There need not be the slightest fear that I shall not do so. But I have private rights as a property owner, and I shall insist on enforcing them."

THE FAVORITE THREE.

Known All Over Canada—Everybody Has Words of Praise for the Three Great South American Remedies—Absolute Specifics for Kidney, Rheumatic and Nervous Troubles—they Relieve in a Few Hours.

The Kidneys—Distressing kidney and bladder diseases are relieved in six hours by the use of South American Kidney Cure, which is a great surprise and delight on account of its exceeding promptness in relieving pain in the bladder, kidneys, back, and every part of the urinary passages in male or female. It relieves the pain and restores the blood of persons troubled with these disorders. A dry powder or pill cannot possibly do this, as neither is a solvent. Use South American Kidney Cure if you would live and enjoy life.

Rheumatism—For the last year," writes William Marshall, of Vardon, Ont., a resident of that district for 40 years, "I was confined almost entirely to my bed with rheumatism. Nothing gave me relief and I had finally given up hope, when South American Rheumatic Cure was recommended to me. The first dose gave me instant relief, and I was out of my bed the following day. I have since used bottles, and I must say I am completely cured, as to suffer no pain whatever now."

The Stomach and Nerves—Mrs. Capt. Hackley, of Owen Sound, was one of those who suffered from indigestion. She seemed never to have completely recovered from an attack, and nervy system prostration took hold of the system. All the doctoring had only a temporary effect. She tried South American Nerve, and continued its use, in a short time she completely regained her strength. Use South American Nerve if you seem to be wearing out. It will rebuild the life forces with surprising rapidity.

The man who lives to make others happy is engaged in the highest calling known on earth.

A Safe and Simple Protection from Cold. Good meals and warm clothing are of more value—if you haven't got them—than anything else. World wide fame seems to be the reward of those who are hungry or the wind is whistling through your body. So any new feature which makes comfortable clothing possible for every one is of more real importance to us than the discovery of a new planet. This is the reason for the great popularity of Filles Chamois, an interesting made from fine spruce fibre, which gives a perfect healthful warmth without added weight or bulk. The reason is that it is an absolute non-conductor of heat and cold. The rawest winds can't get through the clothing lined with it, nor will it let the natural heat of the body escape. So that it ensures comfort in all weather, for a trifling expense.

Forty People Killed.

A St. Petersburg dispatch reports that a passenger train has been derailed near Batraki, on the Samara railway, in southern Russia. Forty persons were killed and injured. The accident was caused by obstructions put on the rails. The authors of the act have not been traced.

DEADLY HEART DISEASE.

CURED BY DR. AGNEW'S GREAT HEART REMEDY—MANY LIVES LOST.

The Secret of Success of Dr. Agnew's Cathartic Powder.

Were it not that Dr. Agnew's Cure for the Heart will give relief within thirty minutes after the first dose has been taken we would not read of so many lives being saved by this remedy. William Cherro, of Owen Sound, Ont., says: "I was greatly troubled with weakness of the head and fainting spells for two years, and often times was unable to get up. Naturally much anxiety was felt by myself and friends, for no treatment seemed to do me any good. I was finally induced, however, to try Dr. Agnew's Cure for the Heart, and found it as proclaimed—a 'speedy cure.' I have now taken five bottles, and it has brought back to my heart the proper action, and made me strong and well."

Catharic—One secret of success in Dr. Agnew's Cathartic Powder is that it is pleasant to use. As Mr. W. H. Bennett, Conservative member in the last House of Commons, said, "taken in the morning, it clears the head of any cold or catarrh trouble that is manifest. But it not alone deals with the minor cases of catharic, but even where deafness and some of the worst forms of disease have become manifest these have been eradicated by this remedy. To the names of George Casey, Hon. J. Davis, Mills, Hugo H. Ross, might be added scores of other members of the late parliament, over their own signatures, have borne testimony to the value of the remedy."

When a Texas militia company all got drunk the other evening, couldn't it be called a genuine case of a spree of corps.

About the Liver.

A lazy, slow or torpid liver influences the whole system, causing biliousness, sick headache, sallow complexion, languor, and dulness. Burdock Blood Bitters regulates the liver, purifies the secretions and cures all forms of liver troubles. We say so and here is the proof.

I hereby wish to thank you for the great benefit derived by me from your Burdock Blood Bitters. For three years I was troubled with liver complaint and tried everything to no purpose. I had almost given up hope until one day I determined to try Burdock Blood Bitters. I can say now that my liver complaint resulted from the use of the first bottle, and at the end of the sixth bottle I discontinued its use, being completely cured.

did not take part in the matches for the District Meet.

It is a fact to be regretted that more friendly games were not played with neighboring clubs, only one visit being made during the season, when Mr. Fortune took a rink to Wawanesa.

Our Bospital was a decided success, and had it not been for the soft weather the first two days would have passed off without a single hitch. As it was, everybody seemed pleased. All our visitors promised to come again and bring their friends.

A fair share of prizes remains here, as well as all the trophies.

It seems to me that it would be well to have at least one event for outside rinks only.

A considerable amount of disappointment was expressed and a great deal of annoyance was felt in view of the fact that Winnipeg was not represented. The reason of course, was that the rink was not in the city.

However, after the persistent manner in which the Brandon Club has attended the Winnipeg bonspiels year after year, it would not be too much to expect one or two rinks from Winnipeg, even were it known that we were curling on bare ground.

It has been felt by many of our members and by many curlers in the western portion of the Province and the Territories, that a western bonspiel might be undertaken with a view to the securing of a rink and the Winnipeg Bospital has assumed such proportions as to be almost unwieldy, it would seem to be an opportune time for Brandon to take the initiative step by announcing its bonspiel for the coming year.

And if this is done I feel confident that the success of the past will be overshadowed and that the next bonspiel will be quite as great an event in the curling world as the now justly celebrated Winnipeg Bonspiel.

Just here I would like to take the opportunity of referring to those who have contributed to our prize list of this year's bonspiel. The Club is indebted to the Hiram, Walker Co. for its gold cup and charm; to Mr. Fred Astor for his beautiful tankard; to Strong and Whyte, Co. and Wilson, Rankin & Co. each for a set of medals; Hon. Mr. Daly and Wilson, Rankin & Co. for a set of cups; to Rutherford & Co. for a set of silver cases; also a long list of cash subscribers.

Curling is a popular game for the first time in our history, concluded. These included the Fortune Competition for the green curlers for a cup presented by Mr. R. Fortune and won by Mr. W. N. Findlay and the Dwyer Silver Medal presented by Mr. R. L. Dwyer, a unique and won by the O'Kelly rink.

In conclusion, let me thank the members and officers for their assistance in many ways during the year and to speak for my success in the same courteous interest in the discharge of his duties I have always received.

THE FARMERS' PICNIC.

This institution is getting to be one of the annual entertainments in the place. The turn out on Tuesday was very large, and the entertainment exceeded any of its predecessors. Prof. Fretter and Robertson and the Hon. J. Hyden gave interesting addresses on the lines of those reported in our columns. The sports were not a success, as the prize list is as follows:
